### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1, 3, and 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. No support can be found for claim 1, line 2's "slurry containing the chromatography column" can be found. No support for claim 1, line 4's "directly" can be found. Page 21 of the specification would appear to indicate that the slurry is transported to the "bottom of the chromatography column" prior to returning to the slurry vessel.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "slurry containing the chromatography column" is considered to render the claims indefinite.

The amendment filed August 27, 2001 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The amendments to Figure 5 and pages 21 and 23 of the specification are considered to be new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

Art Unit: 1723

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(B) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over each of Unger (U.S. Patent No. 5,610,322) and Munch (E.P. 515,955). The claims are considered to read on each of Unger (U.S. Patent No. 5,610,322) and Munch (E.P. 515,955). However, if a difference exists between the claims and each of Unger (U.S. Patent No. 5,610,322) and Munch (E.P. 515,955), it would reside in optimizing the steps of each of Unger (U.S. Patent No. 5,610,322) and Munch (E.P. 515,955). It would have obvious to optimize the steps of each of Unger (U.S. Patent No. 5,610,322) and Munch (E.P. 515,955) to enhance separation.

The remarks urge that the amendments to Figure 5 and pages 21 and 23 of the specification are not new matter. However, they add matter not present at the time of filing the application. As such, they are directed to new matter.

The remarks urge that Unger (U.S. Patent No. 5,610,322) does not show circulating the packing material. However, the only purpose that the pipe extending from the valve at the top of column 1 to packing material receiver (8) could have is to recirculate packing material.

The remarks urge that Munch (E.P. 515,955) does not show circulating the packing material. However, Munch (E.P. 515,955) recirculates material through valves 9 and 11 back to slurry vessel 11.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to E. Therkorn at telephone number (703) 308-0362.
